All these artistic and meticulous details effectively ensure the operation stability and perfect cohesion with different styles of furniture. Matching with green plants and leisure chairs, it offers you a chance to relax yourself under the sunshine.

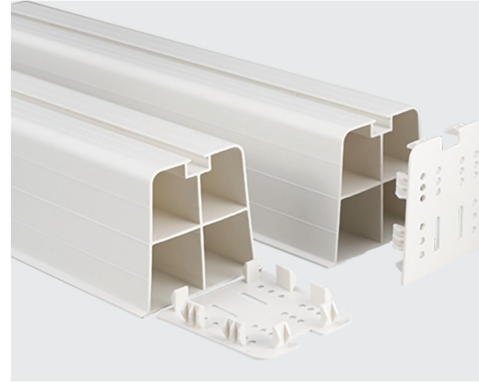

Stylish

Music always echoes with artistic buildings towering around. Architectures of different styles embody diverse creativities and energies that may be new to us.

We envision creating a unique style that is away from the hustle and bustle world. As an alternative, we adopt the wall-based design that echoes with the modern architectural style with refined details, to present a simple yet elegant combination. Aiming to match with the buildings and urban layout, we apply an active design strategy to overcome the limitation in space.

Appropriate yet flexible architectural expression helps us create a science and technology-based enjoyable atmosphere!

GUYAAC's base features high reliability and durability, vibration and noise reduction, unique damping guide, and linear profile.

With larger bearing capacity and greater power, the product's vibration and noise reduction design can effectively reduce noise during operation, bringing you a comfortable atmosphere for sleep.

The elevated external unit brings better thermal diffusivity and longer service life, and the moisture proof and dustproof design ensures a more durable application.
